## Energy Awareness Program

Revision No.17.

In order to ensure energy efficiency of production, PrJSC "Ukrgrafit" has implemented and certified an energy management system in accordance with the requirements of the international standard ISO 50001.

When commissioning new and reconstruction of existing installations, equipment, structures that have a significant impact on the energy characteristics of the enterprise, PrJSC "Ukrgrafit" is guided by the principle of reducing the specific energy intensity of production and reducing gross energy consumption. Equipment and materials purchased by PrJSC "Ukrgrafit", taking into account the price proposals, are chosen, inter alia, for their energy characteristics: low energy consumption and high energy efficiency.

All other things being equal for the proposed product, the implementation of the ISO 50001 standard at the manufacturers of equipment and materials is a priority in the purchase.
